Jitin Kumar Chak

Full Stack Engineer · B.Tech CSE 2026

+91-6398520018 | jitin42013@gmail.com | LinkedIn | GitHub | LeetCode | Portfolio

SUMMARY

Full Stack Engineer with production experience building scalable web applications using React, Node.js, PostgreSQL, and TypeScript. Founded CampusVerse — a live multi-feature platform — leading a 3-member team across architecture, frontend, backend, and deployment. Strong in REST API design, JWT-based auth, component architecture, and performance optimization. 100+ LeetCode problems solved.

EXPERIENCE

CampusVerse - Founder & Full Stack Engineer *Aug 2025 – Dec 2025*

React, Redux, Node.js, Express, PostgreSQL - Live

- Architected and shipped a live full-stack platform with real-time chat, events, blogs, internships, and role-based dashboards for 3 distinct user roles.
- Designed PostgreSQL schema with indexing and cursor-based pagination, reducing average query response time by ~35% on high-traffic endpoints.
- Built layered REST APIs (routes → controllers → services → middleware) with centralized error handling, input validation, and CORS - zero production auth breaches.
- Engineered scalable frontend using reusable components, custom hooks, Redux Toolkit, and code-splitting to optimize bundle size and load time.
- Led a 3-member team via Git PR workflows, code reviews, and Agile sprints delivering all core features within a 5-month timeline.

PROJECTS

FinTrak - Personal Finance Dashboard *Mar 2026*

React, JavaScript, Tailwind, Chart.js - Live | GitHub

- Built an interactive analytics dashboard for income/expense tracking with dynamic Chart.js visualizations.
- Designed modular component architecture, full cross-device responsiveness.

Hospital Management System - Backend Focused Application *June 2025*

Node.js, Express.js, MongoDB, MySQL

- Developed secure REST APIs for patients, appointments, billing, and staff with JWT auth, bcrypt, RBAC, MongoDB indexing, pagination, and centralized error handling.
- Designed modular backend architecture separating routes, controllers, services, and middleware layers, enabling clean separation of concerns and easier maintainability, and a scalable codebase structure.

StreamVerse - Movie & TV Streaming Platform *May 2024*

React, Vite, Tailwind, TMDB API - Live | GitHub

- Built a modular SPA with debounced search, lazy loading, pagination, and dynamic filtering integrated against the TMDB REST API with full error and loading state management.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, C++, Python, SQL
Frontend: React.js, Next.js, Redux Toolkit, Custom Hooks, Vite, Tailwind CSS
Backend: Node.js, Express.js, REST API Design, JWT, RBAC, Middleware Architecture
Databases: MongoDB (Indexing, Schema Design), MySQL/PostgreSQL (Joins, Relational Modeling)
Tools & Concepts: Git, GitHub (PR Workflow), Postman, Vercel, CI/CD, DSA, DBMS, OS, MVC, Agile

EDUCATION

IK Gujral Punjab Technical University, Kapurthala *Oct 2022 – Jun 2026*

Bachelor of Technology in Computer Science & Engineering - CGPA**: 8.33 / 10**

Relevant Coursework: Data Structures & Algorithms, DBMS, Operating Systems, OOP, Computer Networks

CERTIFICATIONS & ACHIEVEMENTS

- Machine Learning Certification - Internshala · Score: 97%
- Cipherthon 2.0 Hackathon (2024) - Built and shipped a working prototype under strict time constraints.
- Solved 100+ Data Structures & Algorithms problems on LeetCode; actively expanding problem-solving portfolio.
