SUMMARY

Full Stack Engineer with production experience building scalable backend services using Node.js, Express, PostgreSQL, MongoDB, and TypeScript. Founded CampusVerse - a live platform with 90+ users designing REST APIs, auth systems, and database architecture from scratch. Strong in performance optimization, security fundamentals (JWT, RBAC, bcrypt), and reliable system design.

EXPERIENCE

Future Finders - Full Stack Trainee

Jan 2026 – Present

React, Next.js, Node.js, Express, SQL, Tailwind CSS

- Completed intensive industry-focused full-stack training program, building multiple production-ready web applications across the complete stack from UI components to REST APIs and database integration.
- Built and deployed full-stack projects using React, Next.js, Tailwind CSS, Node.js, Express, and SQL, applying component architecture, API design patterns, and relational database modeling in real project environments.
- Applied industry-standard engineering practices across all projects Git version control, modular code structure, responsive design, clean code principles, and PR-based collaborative workflows.

CampusVerse - Founder & Full Stack Engineer

Aug 2025 – Dec 2025

React, Redux, Node.js, Express, PostgreSQL - [Live](#)

- Architected and shipped a live full-stack platform serving 90+ active users across 5 core modules - real-time chat, events, blogs, internships, and role-based dashboards for 3 distinct user roles, following a service-oriented architecture with clear separation between data, business logic, and presentation layers aligned with microservices design principles.
- Designed PostgreSQL schema with indexing and cursor-based pagination, reducing average query response time by ~35% on high-traffic endpoints.
- Built layered REST APIs (routes → controllers → services → middleware) with centralized error handling, input validation, and CORS leveraging AI-assisted tools to accelerate development, reduce debugging time and improve code quality.
- Engineered scalable frontend with 15+ reusable components, custom hooks, Redux Toolkit, and code splitting improving initial load time and page performance for 90+ concurrent users.
- Led a 3-member team via Git PR workflows, 20+ code reviews, and weekly Agile sprints delivering 5 core modules on schedule within a 5-month timeline.

PROJECTS

FinTrak - Personal Finance Dashboard

React, JavaScript, Tailwind, Chart.js - [Live](#) | [GitHub](#)

- Built an interactive analytics dashboard for income/expense tracking with dynamic Chart.js visualizations.
- Designed modular component architecture, full cross-device responsiveness.

Hospital Management System - Backend Focused Application

Node.js, Express.js, MongoDB, MySQL

- Developed secure REST APIs for patients, appointments, billing, and staff with JWT auth, bcrypt, RBAC, MongoDB indexing, pagination, and centralized error handling.
- Designed modular backend architecture across 4 distinct layers (routes → controllers → services → middleware), reducing average feature development time and enabling independent scaling of each module.

StreamVerse - Movie & TV Streaming Platform

React, Vite, Tailwind, TMDB API - [Live](#) | [GitHub](#)

- Built a modular SPA integrating 3+ TMDB REST API endpoints with debounced search, lazy loading, and dynamic filtering across 10,000+ movie and TV titles reducing initial load time through code-splitting and pagination.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, C++, Python, SQL

Frontend: React.js, Next.js, Redux Toolkit, Custom Hooks, Vite, Tailwind CSS, HTML5

Backend: Node.js, Express.js, REST API Design, JWT, RBAC, Middleware Architecture

Databases: MongoDB (Indexing, Schema Design), MySQL/PostgreSQL (Joins, Relational Modeling)

Tools & Concepts: Git, GitHub (PR Workflow), Jenkins, Docker, AWS, Postman, Vercel, CI/CD, GitHub Actions, GitHub Copilot, ChatGPT, DSA, DBMS, OS, MVC, Agile

EDUCATION

IK Gujral Punjab Technical University, Kapurthala

Oct 2022 – Jun 2026

Bachelor of Technology in Computer Science & Engineering - Current SGPA: **8.83 / 10**

Relevant Coursework: Data Structures & Algorithms, DBMS, Operating Systems, OOPS, Computer Networks

CERTIFICATIONS & ACHIEVEMENTS

- Machine Learning Certification – Internshala · Score: **97%**
- Cipherthon 2.0 Hackathon (2024) - Built and shipped a working prototype under strict time constraints.
- 1600** Rating on **LeetCode** . Solved **200+** Data Structures & Algorithms problems on LeetCode, Codeforces, NeetCode & HackerRank actively expanding problem-solving portfolio.
